

The power of packaging

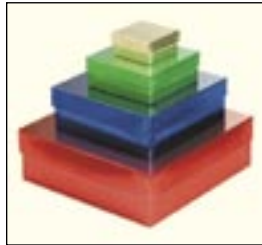

Packaging with a Difference.

Brimar Packaging, Inc. has more than 30 years of experience in the packaging industry. As a turnkey manufacturer of custom set-up, specialty and folding boxes, we offer the full range of graphics capabilities and finishing operations to help your product break through the retail clutter. We'll save you valuable time, space and money with our innovative warehousing programs. Our national pricing structure and ideal midwestern location mean we can serve you competitively regardless of the size of the job or where you're located. Whether you're a manufacturer looking for a quality chipboard carton, or an ad agency with a unique idea for a slipcase, we'll put the power of packaging to work for you.

Custom Set-up Boxes

Good packages come in all sizes.

Quality rigid set-up boxes are a Brimar specialty. Consisting of a non-collapsible bottom and cover, typical examples of this style of box are candy boxes, cosmetic boxes and jewelry boxes. Whether you're considering a custom box manufactured to your existing design and specifications, or looking for creative and strategic solutions to your packaging needs, rely on Brimar to deliver your next project on time, within budget, beautifully. As experts in packaging consultation, we'll be glad to help you design a package that puts your product in its best light.

Elegant Foils

If you'd like a luxurious alternative to our colored paper boxes, consider a brilliant foil.

Embossing & Debossing

We can emboss or deboss your package, with color or blind, for a classic, elegant appearance.

Printing

From simple, one-color line art to vibrant, four-color photographic images, we offer letterpress, offset and process printing capabilities for your box, inside or out. Plus aqueous or UV coating and film laminating, if desired.

Substrates

We stock a variety of board ranging from .030" to .100" thick. Specialty coatings offer extra protection from moisture, water and oil. We also work with custom materials, such as vinyl and leather.

Loose Wrap

In addition to the traditional tight-wrapped box, Brimar offers simulated and full loose-wrap boxes.

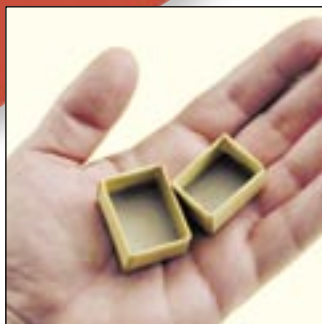

Papers

Thousands of colored, patterned and theme papers are in stock, for a custom look without the custom price.

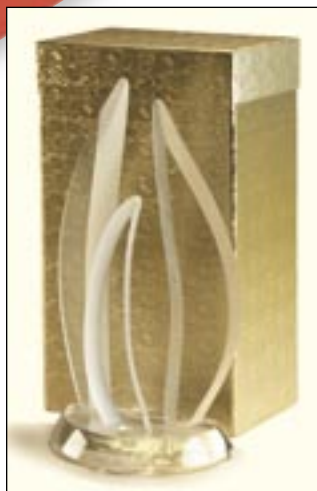

Foil Stamping

Add a look of distinction to your package with a foil-stamped design, available on a wide spectrum of gloss- and matte-colored finishes and foils.

Small Boxes

If good things come in small packages, Brimar can manufacture small set-up boxes as little as $1\frac{1}{4}'' \times \frac{3}{4}'' \times \frac{1}{2}''$ with the paper wrap of your choice.

Deep Boxes

Is your product extra big? Brimar can manufacture boxes as large as 30" x 30" x 12".

Specialty Boxes

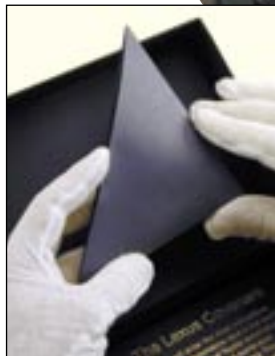

Specialty boxes as unique as your product or application.

When you work with Brimar, the possibilities of sizes, shapes, materials and graphics for your package are as endless as your imagination. In addition to custom set-up boxes, Brimar Packaging also manufactures specialty boxes, for packaging that's as unique as your product. A specialty box may have a hinged lid, fabric covering or different shape. Different materials and styles of inserts are also available to enhance the presentation and protection of your product. Contract packaging, warehousing and shipping are available to help you simplify the manufacturing/distribution process.

Hinged Lid Boxes

A hinged lid enhances the value of a product. It also creates extra impact when there's a special message to be presented, such as with a unique direct mail project or creative sales kit. Hinges may be paper, metal, stitched or taped.

Hand Finishing

Because every specialty box is unique, they are often hand finished.

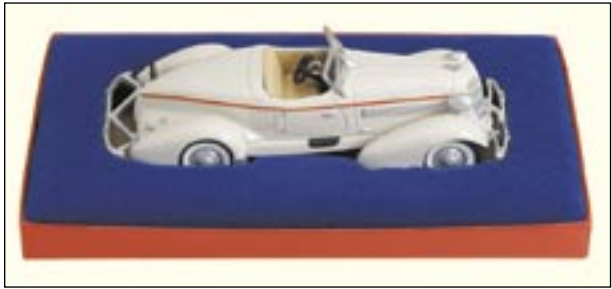

Leather Effect Coverings

For that special elegance, select from dozens of simulated leather coverings.

Box Inserts

We offer several insert styles to suit your specific presentation — each available in a spectrum of colors to complement your product. Insert types can even be combined to create unusual packaging effects.

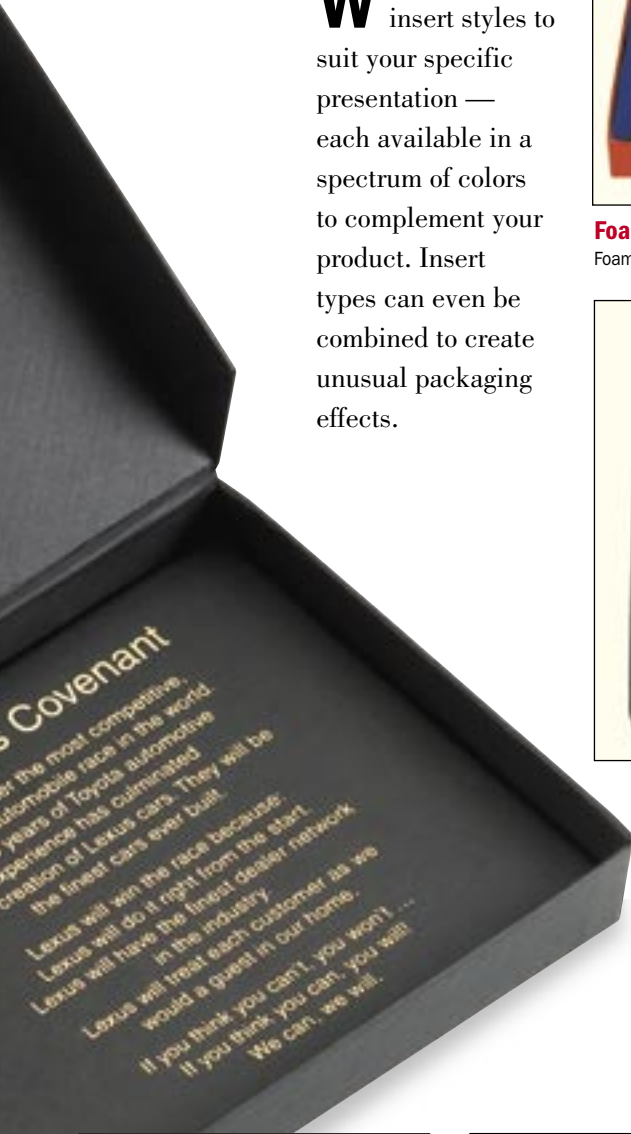

Foam Inserts

Foam inserts are great where extreme protection is a must.

Vacuum-Formed Inserts

This type of insert is perfect when products have complex shapes or are very small, or when several products are presented in one package. Vacuum-formed inserts are available in a wide range of colors, with or without flocking.

Die-Cut Inserts

A die-cut insert features a recess composed of chipboard. The insert can be wrapped in colored, printed, velour or foil paper.

Book Boxes

For video tapes or CD's, book boxes make a great presentation.

Vinyl Boxes & Inserts

Showcase your product in vinyl.

Brimar Packaging manufactures boxes from .007" to .010" in clear or tinted vinyl. Common examples of boxes using vinyl are greeting card boxes, candy boxes and cosmetic boxes.

Vinyl boxes are clearly the best choice when the product practically sells itself. Vinyl boxes can have a matte or gloss finish, be translucent or opaque, or even foil-stamped. They can work solo or be combined with custom inserts.

Inserts may also be vinyl, or they may be die-cut, foam or vacuum-formed.

Tinted or Opaque

Accomplish a translucent effect with clear vinyl. Choose an opaque vinyl when deep, solid color is desired.

Inserts to complement your product

You can choose the type of insert that best suits your product, such as foam or foil-laminated inserts.

Foil-Stamped

Finish your vinyl package with foil. Dozens of color choices are available.

Folding Boxes

Assembly solutions.

Brimar also designs and constructs easy-to-store, easy-to-assemble folding boxes in all boards, in thicknesses from .012" to .028". We're equipped with in-line and right-angle gluers to manufacture most folding carton styles. Folding boxes can be printed, foil-stamped, embossed or debossed with the design of your choice. Many other finishing operations are also available.

Folding Box Styles

- ____ Straight Tuck
- ____ Reverse Tuck
- ____ Snap-lock Bottom
- ____ Auto Bottom
- ____ Glued Sleeves
- ____ Beers Style
- ____ Simplex
- ____ ...and more

Custom Slipcases

Perfect for series and collections.

A slipcase could house virtually anything, but it commonly holds manuals and software, or a series of CDs, tapes, magazines or books. Depending on the specifications and size, Brimar can manufacture several different styles of slipcases. As with boxes, many of our manufacturing and finishing operations can be used and combined for a presentation that's truly unique.

“

"I'd like to thank you and everyone who worked on our order. It's not often that my vendors provide a good quality product, on time, under budget, without hassle. Congratulations." Thank you, Andrea Mariash Sheehan Corp.

"Just wanted to send a note to say thank you for doing such a great job, in such a short amount of time. I know how hard it is to hit deadlines and you and your company have made it a lot easier for me to hit mine." Thank you again, Lance Brown Harry London Quality Chocolates

"It has been a great experience working with you. I very much appreciate what you and your staff have done for our company. It is nice to know the support I get from you." Thanks, Dennis Bates Leeds Business Accessories

”

Performance without Limits.

At Brimar Packaging, we'll save you space, time and money. So there are no limits to the levels of packaging performance you can achieve.

Small and Large Runs.

We don't require minimum orders. Of course, the larger the quantity, the lower the price, but with no minimums, you have the opportunity to decide what quantity and price works best for your company.

Central Location, Competitive Pricing.

Logistically speaking, we're well positioned in the heart of the country, in Cleveland, Ohio. We work with manufacturers, distributors and ad agencies throughout the U.S. We're keenly aware of the national set-up box market, and our pricing and terms are the best anywhere.

Flexible Warehousing Programs.

Take advantage of quantity discounts while saving valuable warehouse space. We can finance, insure and store your order until shipping time. Then we'll bill you only for the boxes shipped. Our 120,000-square-foot facility has plenty of room to safely warehouse your boxes.
